OBJECTIVE

My objective is to leverage my knowledge of MongoDB, Express.js, React, and Node.js to contribute effectively to a dynamic development team. I aim to apply my skills in building scalable and responsive web applications, while continuously learning and adapting to new technologies and best practices in the field of full-stack development. With a passion for problem-solving and a strong foundation in web development principles, I am eager to contribute to innovative projects that push the boundaries of technology and user experience.
